

SEI BULLETIN - MARCH 22, 2017

Experiences Using IBM Watson in Software Assurance

Since its debut on Jeopardy in 2011, IBM's Watson has generated a lot of interest in potential applications across many industries. Recently, Mark Sherman, technical director, Cyber Security Foundations in the SEI's CERT Division, led a research team investigating whether the Department of Defense could use Watson to improve software assurance and help acquisition professionals assemble and review relevant evidence from documents. In this SEI Blog post, Sherman describes the team's work and examines whether typical developers could build an IBM Watson application to support an assurance review.

ABOUT THE SEI BULLETIN

The SEI Bulletin is a biweekly newsletter designed to keep you up to date on SEI news, events, research, and other matters of interest to the SEI community. We hope you find the SEI Bulletin useful and informative.

SEND US YOUR STORY

Do you have a story about how an SEI technology has positively affected your team or organization? If so, the SEI would like to hear about it. Send a short summary of your success to info@sei.cmu.edu and you could be featured in a future issue of the SEI Bulletin.
