

Insider Threat Certificate Programs

CERT Division

Insider Threat Vulnerability
Assessor (ITVA) Certificate

A Call for Action

President Obama's Executive Order 13587 mandates federal agencies operating or accessing classified computer networks to implement an insider threat detection and prevention program. In addition, proposed changes to the National Industrial Security Program Operating Manual (NISPOM) would require the same of contractors that engage with such federal agencies.

As a result, the need for qualified experts to support organizations in the development and operation of insider threat programs is now greater than ever.

To meet this growing demand, we are developing new solutions to transition our important research to enable others to also provide this critical support. Our certificate program can help organizations to meet this demand and satisfy the requirements of the Executive Order with sophisticated, flexible insider threat programs that are tailored to the unique circumstances of individual organizations.

Learn From a Trusted Partner

Our research partners include the Department of Defense, the Department of Homeland Security, the U.S. Secret Service, the intelligence community, private industry, academia, and the vendor community. As a trusted third party between government, industry, and academia, the CERT Insider Threat Center is in a unique position to help organizations with their insider threat challenges.

Our new insider threat certificate programs will educate professionals on how to help organizations identify and manage their insider threat risks, and how to measure their preparedness to defend against them. The new programs will also teach how to evaluate an organization's insider threat program, or even build and operate one from scratch.

Certificate Programs

Insider Threat Program Manager (ITPM) Certificate
Expected Program Launch – Available

Insider Threat Vulnerability Assessor (ITVA) Certificate
Expected Program Launch – Available

Insider Threat Program Evaluator (ITPE) Certificate
Expected Program Launch – Available Fall 2017

Insider Threat Vulnerability Assessor (ITVA) Certificate

The ITVA program enables assessors to help organizations gain a better understanding of their insider threat risk and an enhanced ability to identify and manage associated risks. The assessment methodology assists organizations by measuring how prepared they are to prevent, detect, and respond to the insider threat. Organizations will have the ability to license the CERT Insider Threat Vulnerability Assessment tool for internal use or to assess others for potential vulnerabilities.

Components

COURSE	DELIVERY	AUDIENCE	COMPLETION DATE
<p>Insider Threat Overview: Preventing, Detecting, and Responding to Insider Threats</p> <p>This 5-hour course provides a deeper understanding of insider threat terminology, identifies the different types of insider threats, teaches how to recognize both technical and behavioral indicators, and outlines mitigation strategies.</p>	E-learning	Team Members Program Managers Candidate Assessors	Available
