INCH Requirements
<draft-ietf-inch-requirements-03.txt>

IETF-62 Minneapolis,
March, 2005
Status:

Current draft:
draft-ietf-inch-requirements-03

We are done (almost)
Changes since 02:

- title changed to
  Requirements for the Format for Incident information Exchange (FINE)
Changes since 02:

- RFC2119 key words used
- added description to 4.6

FINE itself need not guarantee authenticity, integrity, or non-repudiation. However, the specification must detail a standardized mechanism to ensure these properties.
Changes since 02:

- modified figure 1
- moved req 4.5 (global identifiers) to the content requirements
- moved req 4.7 (unambiguous semantics and extensibility) to general requirement
Changes since 02:

- cleaned up and re-ordered the definitions
- modified figure 1
- dropped implementation details from req 4.1
Changes since 02:

Issues

Add transport requirements?

5.1 The communication mechanisms MUST NOT have any bearing on the security of a FINE incident report.
